

GEM Link® **Room Status Scanner**™
WIRELESS An Optional Feature of GEM Link® Wireless

The **Room Status Scanner**™ (RSS) allows housekeeping, maintenance, mini-bar service, and security personnel to determine from the hallway whether someone is in a room ... without knocking and disturbing guests while sleeping, dressing, or showering.

From the hallway, authorized personnel enter the room number on the RSS keypad.

If someone is in the room, the “**OCCUPIED**” indicator on the RSS will illuminate **RED**.

If no one is in the room, the “**VACANT**” indicator on the RSS will illuminate **GREEN**.

SAVES TIME — ELIMINATES EMBARRASSING INTRUSIONS UPON GUESTS

* RSS requires GEM Link® Wireless Energy Management.

GEM Link® Wireless Energy Management reduces guestroom energy costs **35% to 45%** and connects to *any* HVAC system. GEM Link® determines physical presence of guests in rooms by detecting body heat, provides guests complete control of room environment while in the room, and takes control when guests leave the room by resetting temperature to energy conserving levels.
